Food Security: Progress and a Way Forward

Today I have the privilege to participate in a discussion as part of The Chicago Council on Global Affairs' Symposium on Global Agriculture and Food Security: Progress to Date and Strategies for Success. The Chicago Council's efforts have been instrumental in elevating global food security as a U.S. policy priority. We are grateful to them for the opportunity to reflect on the progress we have made so far and remaining challenges we all face in tackling this issue.

At a time when food prices are reaching all-time highs, drawing millions into poverty and undermining global stability, it is critical that we maintain our focus on establishing long-term agriculture-driven economic development. And that's just what Feed the Future, the U.S. Government initiative to address global hunger and poverty, is about.
