## Drinking Milk at Home in Ethiopia

Submitted by kdad on August 1, 2014

Senait Ayele (right) drinks a cup of milk. Ayele lives with Fasika Derso in Gondar, Amhara, Ethiopia. Derso's sons are grown and no longer live at home. Ayele helps Derso with the housework and with caring for their cow and calf. Much of the milk the cow produces is consumed at home as the market for milk in Gondar is poor due to a surplus of supply.

A USAID livestock development project in the region, part of Feed the Future, focuses on fostering growth and reducing poverty through improving the productivity and competitiveness of Ethiopia's livestock value chains.
